According to GASTAT flash estimates, the real Gross Domestic Product (GDP) grew by 1.1% in Q2 2023 on an annual basis, due to the increase in non-oil activities by 5.5%, and government activities by 2.7%, however, oil activities decreased by 4.2%, which is attributed to the agreement of OPEC and its alliance in June 2023 to continue the reduction of daily oil output, in an attempt to maintain price stability. Thus, Saudi Arabia decreased its daily oil production by 1 million barrels a day.

Inflation rate rose to 2.7% in Q2 2023 compared to the same quarter last year. This rise is due to the increase in prices of housing, water, electricity, gas, and other fuels by 8.6%, and restaurants and hotels by 5.2%.
